

Independence Public Library Questions and Answers

What will the new facility offer in the way of computer access?

The new library will have increased computer access, which is very much needed! Often, all computers are full and people have to wait to use one. There will be approximately five desktop computers centrally located near the check-out desk as well as several computers in both the adult and children's sections. The library will have wireless access for those bringing in their own laptop computers. Also, the library will have several laptop computers available for checkout which could be used in most any location in the new facility. The improved flexibility and increased computer access will be a great benefit to the community.
